

For choropleth maps (location quotient – showing which areas have more than another and Morans'I I showing which areas are clustered) which colour scale would look best? Do you want a different color?

([png](#), [hires.png](#), [pdf](#))

For clustering (i.e. discrete categories – ‘chicken loving areas’, ‘coffee loving areas’) etc. what type of colours would look best? (choose 5-7 discrete colours) – examples below or make up your own!
